

## USB-C DUAL SCREEN DOCKING STATION WITH POWER DELIVERY

Charge your laptop whilst connected to a desktop environment, all from a single USB-C cable.

This powerful little docking station encompasses USB-C technology allowing Power Delivery (PD) upstream charging function to charge your connected laptop, smartphone or tablet. Combined with the additional USB-C and USB 3.0 ports, you can enjoy SuperSpeed data transmission to and from USB peripherals and expand your computers connectivity including dual displays, networking and sound all via a single USB-C cable.

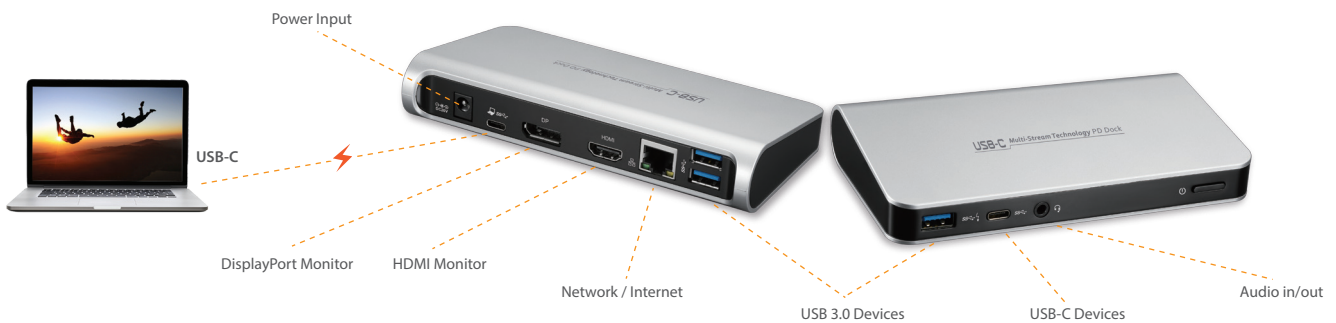

DisplayPort (DP) and HDMI ports allow you to mirror your primary screen or extend the desktop. Multi Stream Transport (MST) mode allows you to display identical or different content on up to two external monitors.
